  "body": "We have less pain the concept of data analysis and calls\\blackmail. I suggested to Buz the following scheme:\n\nWe have a reconnaissance rocket separate. there is a group on requests - there hackers are asked to put pressure on or prepare this or that company. we pass it on to analysts, they make a dossier report. if blackmail\\calls are required - we transfer this task to the callers. To call"
}
```

work efficiently and call not in the air as it is happening right now - they are in touch with analysts, they can ask them for any additional data

- its data is transferred further for publication on the site. (to do this, you need to bring either a reshaev or some of his support into this chat)\n\nthe essence of the problem with calls is such that most often when calling, the caller ends up at the reception where some kind of tpshka does not know the situation at all. and in fact, we just came out of nowhere with such a call, we need some kind of proof to get a result, and not just to hang up or send calls.\n\nIn principle, everything is already working, you just need to tweak it and so that hackers start using it. I pulled a gang of dereke, horsa there, I'll also pull up the reverse .. "

"body": "Professional - I talked to him, he said that you'll decide everything there yourself and tell me what to do, in the end there was no information from you or him.. \n\nBro if you can pliz pay a little more attention - I try to work on all your Wishlist, and you read everything through the line. with him for the blockchain eventually talked. I understand that the social network will be on the blockchain, but the development of the social network also needs coders - here he has them. As for the part

blockchain - we will look for other people for this .. so, in the end, you didn't talk to him for that at all, well, or I don't understand something correctly in those tasks that you you put\n\nFuck here day and night on all fronts what you put, I want you to be I'm happy with everyone there, I constantly show some kind of initiative, and in the end you answer once a day at best .. \n\nAnd about the fact that you pulled up someone close - well, yes, I pulled it up, through my brother I found the right people to solve your problem . Nobody can do that to you online. And offline, I don't think that you will find the same frostbitten guys who will agree to risk a normal white company with a good turnover and reputation, and even more than one in the end. I didn't find it, and no one else would have found it, it's not for you to buy coke on a hydra, there the private security service works like in the white house. It was just a fucking difficult task, and in the end we put the squeeze on it, bought it. I also promised the guys on my own behalf heifers and a sauna, because it really was, well, not very easy. The same goes for Alka - you set the task of solving her problem. I go out of my way to solve this, since I have good opportunities in this area - but again, this is all offline, through a trusted person in whom I am 100% sure. I perfectly understand that this is at least a thread to me. And I also understand my personal risks. But I do your request as for
```

myself. In general, I try to solve all these very extravagant quests of yours. I worry about the results of the whole team as for their own. I get upset when negativity flies at the trick and I try to fix it all, fix it and finalize it .. I save your money as my own, I demand reports from everyone, I bargain with everything, I collect sanctions if to someone

There are such .. On all financial issues, everything is always clear and several times I unsubscribe to you what was spent where and how much, why and why. But I have a clear feeling that you are not interested in all this at all. I'm not an extrasensory. I can't think of your cunning plan and all your wishes for you. Unsubscribe then tasks more precisely. I wrote about offline that I would do it through friends - I wrote this all the time. You didn't say a word. And now you're saying you can't. We also talked about the budget of all these movements more than once - you wrote that ok, 50 60k norms suits you .. And then it turns out that you don't need it anymore. I am writing that we have people whom we did not take into account earlier - I know that you do not have time for this, I decide the issue with them myself so as not to soar you and not beg for the next 3-5k, I unsubscribe everything to you and write down where and for what was spent - and you don't even remember about it. \nYou constantly make me think that you are not interested in what is happening here, that no matter how hard I try for you, I bring some results - and you fucking remember after 2 days about it .. \"then, tomorrow, yes, ok \\\" These are all trifles for you, but I lived here all my life until I organized and muddied all this. I'll be so gray-haired in a year or another."

  "body": "Professional - I talked to him, he said that you will decide everything yourself and tell me what to do, in the end there was no information from you or him.. \n\nBro if you can pliz pay a little more attention - I try to work on all your Wishlist, and you read everything through the line. with him for the blockchain eventually talked. I understand that the social network will be on the blockchain, but the development of the social network also needs coders - here he has them. As for the part

blockchain - we will look for other people for this .. so, in the end, you didn't talk to him for that at all, well, or I don't understand something correctly in those tasks that you you put\n\nFuck here day and night on all fronts what you put, I want you to be I'm happy with everyone there, I constantly show some kind of initiative, and in the end you answer once a day at best .. \n\nAnd about the fact that you pulled up someone close - well, yes, I pulled it up, through my brother I found the right people to solve your problem . Nobody can do that to you online. And offline, I don't think that you will find the same frostbitten guys who will agree to risk a normal white company with a good turnover and reputation, and even more than one in the end. I didn't find it, and no one else would have found it, it's not for you to buy coke on a hydra, there the private security service works like in the white house. It was just a fucking difficult task, and in the end we put the squeeze on it, bought it. I also promised the guys on my own behalf heifers and a sauna, because it really was, well, not very easy. The same goes for Alka - you set the task of solving her problem. I go out of my way to solve this, since I have good opportunities in this area - but again, this is all offline, through a trusted person in whom I am 100% sure. I perfectly understand that this is at least a threat to me. And I also understand my personal risks. But I do your request as for

```

myself. In general, I try to solve all these very extravagant quests of yours. I worry about

the results of the whole team as for their own. I get upset when negativity flies at the trick and I try to fix it all, fix it and finalize it .. I save your money like my own, I demand reports from everyone, I bargain with everything, I collect sanctions if there are such people for someone .. Everything is always clear on all financial issues and several times I unsubscribe to you what was spent where and how much, why and why. But I have a clear feeling that you are not interested in all this at all. I'm not an extrasensory. I can't think of your cunning plan and all your wishes for you. Unsubscribe then tasks more precisely. I wrote about offline that I would do it through friends - I wrote this all the time. You didn't say a word. And now you're saying you can't. We also talked about the budget of all these movements more than once - you wrote that ok, 50 60k norms suits you .. And then it turns out that you don't need it anymore. I am writing that we have people whom we did not take into account earlier - I know that you do not have time for this, I decide the issue with them myself so as not to soar you and not beg for the next 3-5k, I unsubscribe everything to you and write down where and for what was spent - and you don't even remember about it. \nYou constantly make me think that you are not interested in what is happening here, that no matter how hard I try for you, I bring some results - and you fucking remember after 2 days about it .. \"then, tomorrow, yes, ok \" These are all trifles for you, but I lived here all my life until I organized and muddied all this. I'll be so gray-haired in a year or another."
