"\n\nhello, yesterday francis relayed that because of a complaint my salary is in question now and
I need to write to you.last week franc asked to extend his two test servers, they were not in the extension,
because in august he said \"..we'll see..\" As for them, I don't remember exactly. I paid for these servers
and after 10 minutes everything was turned on. It seems that the defender wrote to me the next day that
Frank complained about me and in general these servers are important. I explained the situation to him
too, about their importance to me the defender himself said for the first time, agreed that I would extend
and ask customers about the extension when ordering, there were no showdowns, there was no more
dialogue with Frank except for the extension, only he, apparently, also wrote to Francis, who sent me to
you. before that there were the situation too, but I took measures, took an inventory for a month,
demolished the system, updated all the lists, there are no problems. frank, my responsibility, I should
have turned to him myself, but I didn't think that they were needed at all" } {

I paid for these servers and after 10 minutes they turned on everything ok. it seems like the defender wrote to me the next day that frank complained about me and in general these servers are important. I explained the situation to him too, the defender himself told me about their importance for the first time, agreed that I would extend and ask customers about the extension when ordering, there were no showdowns, there was no more dialogue with Frank except for the extension, only he, apparently, also wrote to Francis who sent me to you. Before that, there were situations too, but I took measures, I did an inventory for a month, demolished the system, updated all the lists, there are no problems. Frank's servers are my responsibility, I had to contact him myself, but I did not think that they were needed at all"
