  "body": "1. I wrote everything to Salamander, I'm waiting for reports from him.\n\n2. Contacted Veron - he has troubles with the dock so far. I promised to help him during the holidays, or we'll make a dock for him, or the second option is a container. I gave him a presentation, described everything how it works and what he can do, I'm waiting to get acquainted. At the start, he will say during the holidays - he is waiting for the issue with the dock\\delivery of the payload to be resolved.\n\n3. You did not answer what config is needed for installs. I remind you that we decided to give the version of Trick2 for it (which was originally planned for Target) for Veron - what modules should be in the config troy, and which ones can be removed so that unnecessary modules are not fired and reduce the weight\\detections in exe. If I understand the software device correctly, I need an injector, pvgrab, importdll. What other modules are vital in the config?\n\n4. We contacted Khors about admins - he clarified the task, He says we need pentesters rather than admins. And at 6 in the morning, a great idea came to my beautiful and drunk head where to get them :) Do you remember the revils were promoted for damage - they threw lam bucks in cue balls on a deposit and then they started to break the topic - they wrote there that they were inviting teams of hackers\\pentesters to work with them. They wrote 5 pages of the topic with suggestions! They write something like that. \"Team 3 person experience and so on\" and there are a lot of them 5 or more even pages! That's where we'll take them! I will spam personals with an offer for them all about work + many left contacts there themselves (although everyone has toxins). By the 10th will be done. The only question is how to pay them. How much do we pay? 2k - how is everyone?\n\nAnd sn me if possible) bc1qclzlq8j3ckmulye0k5xpzfymssxha735mlauf"

So that if the file gets tired quickly (and this is not uncommon for us + its volumes) - we always had a ready-made encrypted second file in order to avoid I think it will be a good move, I just remember the times when I myself lil - our main problem was to get the file by 10 am (and he is an early bird and does not tolerate delays) and the second point is the replacement of crypts - earlier it could last for 2 hours. And with such a maneuver, we are well reinsured" } {

  "body": "1. I wrote everything to Salamander, I'm waiting for reports from him. \n\n2. Contacted Veron - he has troubles with the dock so far. I promised to help him during the holidays, or we'll make a dock for him, or the second option is a container. I gave him a presentation, described everything how it works and what he can do, I'm waiting to get acquainted. At the start, he will say during the holidays - he is waiting for the issue with the dock\delivery of the payload to be resolved.\n\n3. You did not answer what config is needed for installs. I remind you that we decided to give the version of Trick2 for it (which was originally planned for Target) for Veron - what modules should be in the config troy, and which ones can be removed so that unnecessary modules are not fired and reduce the weight\detections in exe. If I understand the software device correctly, I need an injector, pvgrab, importdll. What other modules are vital in the config? \n\n4. We contacted Khors about admins - he clarified the task, He says we need pentesters rather than admins. And at 6 in the morning, a great idea came to my beautiful and drunk head where to get them :) Do you remember the revils were promoted for damage - they threw lam bucks in cue balls on a deposit and then they started to break the topic - they wrote there that they were inviting teams of hackers\pentesters to work with them. They wrote 5 pages of the topic with suggestions! They write something like that. \"Team 3 person experience and so on\" and there are a lot of them 5 or more even pages! That's where we'll take them! I will spam personals with an offer for them all about work + many left contacts there themselves (although everyone has toxins). By the 10th will be done. The only question is how to pay them. How much do we pay? 2k - how is everyone?\n\nAnd sn me if possible) bc1qclzlkq8j3ckmulye0k5xpzfymssxha735mlauf"

So that if the file gets tired quickly (and this is not uncommon for us + its volumes) - we always had a ready-made encrypted second file in order to avoid I think it will be a good move, I just remember the times when I myself lil - our main problem was to get the file by 10 am (and he is an early bird and does not tolerate delays) and the second point is the replacement of crypts - earlier it could continue for 2 hours. And with such a maneuver, we are well reinsured "

All states have their own laws and respectively, lawyers. This one is specifically from Florida, he is local there, he seems to know everyone. At 5 in the morning he was blown up) they gave him all the data he is already engaged in. He told them this: we need to clarify the situation with all the latest news, find out who her lawyer is and what claims go to her, etc., in general, for now, intelligence, they will try to get all the official papers that we have, and we will continue to think. we'll get it or the minimum possible.
